Close Enough for Scientific Work   söftware carpentry

We don't test testing because:
- What tests to write?
- What tolerances to use?

So show scientists how we test our code so that they'll know how to test theirs.

for each problem do:
- describe the problem
- write simple solution
- test & explain
- add & test one thing

- public repo on GitHub
- use any format you want
- we'll do copy editing
- everything CC-BY
- royalties to charity
